

To the friends and loved ones of Rev. Douglas Edwards, H.R.,

Last March, Douglas underwent emergency brain surgery after the unexpected discovery of a brain tumor. While the operation successfully removed the tumor, it left Doug with reduced mobility and independence. Despite the physical and mental challenges of the surgery, Doug continues to be in good spirits and expresses his gratitude for life often. He enjoys hearing from friends and has been very happy to receive phone calls, emails, text messages and visits from his community. His faith, positive mindset and flexibility have been inspirational to those around him. We ask for your continued prayers and well wishes for his health and comfort while he adjusts to a different way of life.

For those who are able, the Edwards family has started a [Go Fund Me](#) to raise money for his home-health care that he needs to recover from brain surgery. Doug has consistently given so much to his community, his friends, and his family throughout his life and is now in need of help in return. Doug needs additional help and caregiving to keep him safe and help him become stronger and healthier. The family would be so grateful for any contribution that you are able to give. We thank you so much for your thoughts, prayers, and any support for Doug.

With great love and gratitude,

Amanda, James (daughter and son)

and the rest of The Edwards family
